

Figure 1. A schematic diagram illustrating the experimental design. The figure shows two parallel horizontal timelines representing the duration of the study. The top timeline is labeled "Participant 1" and the bottom timeline is labeled "Participant 2". Both timelines start at a point labeled "Baseline". Following baseline, there are three distinct phases indicated by brackets above each timeline. Phase 1 is labeled "Phase 1" and Phase 2 is labeled "Phase 2". Between Phase 2 and Phase 3, there is a period labeled "Washout". Phase 3 is labeled "Phase 3". Each phase contains a series of vertical bars representing individual trials or measurements. The bars are grouped together for each phase. The overall duration of the study is indicated by a bracket below the timelines, spanning from the start of the first phase to the end of the third phase.
